Comunicazione approvazione	2015-1-AT01-KA202-004976
Obiettivo del Progetto	"At the moment ECVET is too conceptual and far from easy to implement. Moreover there is a huge gap between companies and the education sector in relation to timescales." (ECVET Magazine, 11/2013 as consequence of the annual ECVET forum 2013). This statement of the workshop held with representatives of all European countries on the involvement of companies into the ECVET and whole transparency instruments process shows one of the most crucial success or fail factors of the ECVET process - the world of business.
